

Contact list

The Contact list is available from the [Contacts](#) form by clicking the button "List".

This is a classic Datagrid.

Click on the link with the contact's name to go to their record.

Its advantage is that you can do advanced searches with criteria.

Click on [Criteria] to show/hide the available Criteria. Select a filter and enter the value you are looking for. Click on [Apply] to get the results of your query. Otherwise, select [Reset Criteria] to undo the recent changes you made to the Criteria.

After applying some criteria or a Sort, you can export the results in Excel format.

To undo all changes, select [Reset].

The screenshot displays the 'Contact list' interface. At the top, there's a section for 'Advanced sorting' with a dropdown menu currently set to 'Last Name - First Name'. Below this is a 'Criteria' section with several filters: 'Lastname', 'Firstname', 'Address', 'Phone', and 'Mobile'. Each filter has a 'Select' dropdown and an input field. At the bottom of the criteria section are three buttons: 'Apply criteria', 'Reset criteria', and 'Clear criteria'. Below the criteria section is a 'Tools' section containing a 'Reset' button, a 'Rows per page' dropdown set to '10', an 'Export to Excel' button, and an 'Add new record' button. In the bottom right corner, there is a link that says 'Need help?'.

You have the ability to navigate the pages or go directly to a page.

Clicking on the header of each column will sort the table according to this field, ascending or descending. You can also use the "Advanced sorting".

You can set the number of rows per page.
