Create account

There are two ways to create a MediSign account:

1. with your **email** and a password - see here Create account with Email
2. using your **Google** Account - see here Create account with Google

Which way should I choose?

It is a matter of personal preference.

However, if you have a Google account, creating a MediSign account using your Google Account has more advantages:

- account creation is faster
- you do not need to verify your email
- you do not need to remember “one more” password
- Basic information from your Google profile is available (email, name, photo, etc.) so you do not need to re-enter it in MediSign
- Enabling Google 2-Step Verification provides excellent protection for your account
