

Security advice

1. Choose complex passwords and keep them carefully. Use a password manager for this purpose.
2. Do not use your passwords on public access computers and unknown Wi-Fi networks
3. Keep your operating system and browser up to date with the latest updates
4. Use protection programs such as Antivirus and Firewalls
5. Always lock the screen of your computer, tablet or smartphone or - even better - choose to lock it automatically after a few seconds of not using it.
6. Always exit MediSign correctly, by selecting "Logoff" and not by closing the tab or the browser.
